Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Judith Wood under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

Summary

U.S. coal production in the week ended April 23, 1988, as estimated by the Energy Information Administration, totaled 17.8 million short tons (bituminous coal and lignite, 17.7 million short tons; Pennsylvania anthracite, .08 million short tons). This was 2.5 percent lower than production in the previous week, and was 10.1 percent higher than production in the corresponding week of 1987.

The 85.0 million short tons produced in March 1988 represents an all-time record for the month, surpassing the 83.9 million short tons produced in March 1982. First quarter 1988 coal production was 7.4 percent higher than the amount produced during the first quarter of 1987. More than half of the increase was from Wyoming and Montana.

| Production and Carloadings | Week Ended | | | 52 Weeks Ended | | |
|-------------------------------------|------------|----------|----------|----------------|-----------|----------------|
| | 04/23/88 | 04/16/88 | 04/25/87 | 04/23/88 | 04/25/87 | Percent Change |
| Production (Thousand Short Tons) | | | | | | |
| Bituminous ¹ and Lignite | 17,744 | 18,197 | 16,104 | 928,961 | 873,188 | 6.4 |
| Pennsylvania Anthracite | 75 | 87 | 82 | 4,293 | 4,209 | 2.0 |
| U.S. Total | 17,819 | 18,284 | 16,185 | 933,254 | 877,397 | 6.4 |
| Railroad Cars Loaded | 118,591 | 121,108 | 104,550 | 5,985,171 | 5,582,955 | |

¹Includes subbituminous coal.

Notes: 1987 and 1988 data are preliminary. Total may not equal sum of components because of independent rounding.
Sources: Association of American Railroads, Transportation Division, Weekly Statement CS-54A; Energy Information Administration, Form EIA-6, "Coal Distribution Report" and State mining agency coal production reports.

Some of the Montana increase is due to growth in coal contracts encouraged by actions of the Montana State Legislature to allow coal severance tax reductions if 32.2 million short tons of coal are produced between July 1, 1987, and June 30, 1988. A shortfall in hydroelectric generation due to continued drought conditions in western, midwestern, and southeastern States; recent increases in spot market sales; and lower rail shipment rates also led to increased production of Pow-

der River Basin coals in Montana and Wyoming during the first quarter of 1988.

The consumption, imports, exports, and stocks data for 1987 reported in Tables 4 through 14 are final and may include revisions.

The methodology used to make weekly coal production estimates is published in the Quarterly Coal Report (DOE/EIA-0121)
